Green Schools is a 501(c) 3 Non-profit Organization whose mission is to create greener and healthier learning environments through education and awareness. We offer a number of environmental education programs and resources for schools and communities.

The Green Schools ESP Program develops student leaders with a passion for improving their communities while preserving our environment. Topics addresses through ESP projects often include: Environmental Health, Sustainability, Conservation, Renewable Energy, Waste Management, Green Jobs, and more. ESP students will actively work to improve their school or community by way of implementing A customized service project.

ESP students will be invited to other environmental events with Green Schools' existing Ambassadors.

We look forward to working with you, and hope to be of service to your community!

Sincerely,
Robin Organ-Executive Director & Founder of Green Schools
